PayStand: Smarter Business Payments

Go digital with the 0% B2B payment network built for today's Internet.

More and more business customers want to pay their bills online, but lack a simple and secure way to do it. If you're like many businesses, you'd rather take payment by old-fashioned paper checks than pay the transaction fees on credit and debit cards. But check payments are slow to arrive and process.

Today, you have a better option. **PayStand** is a Web-based payment platform that lets you accept **eChecks** (direct bank debit), **ACH**, **credit card** and even **paper check** payments using smartphone photo capture.

PayStand doesn't just give you more ways to get paid, it gives you control over your cost of doing business. Our **Payments-as-a-Service** model gives you everything you need to accept payments online in a flat monthly subscription plan, instead of charging a fee on every transaction.

It's easy to set up your business on PayStand and accept payments right away, or use our flexible APIs to integrate a secure payment gateway with your systems.

Accept eChecks

**Accept ACH Bank Transfers**

Accept Credit Cards

Accept Mobile Payments

Instant Funds Verification

Integrate with Our APIs

Enable your customers to pay you on the Web or from their mobile device, 24/7.

PayStand: Modern Business-to-Business Payments

eCheck
Accept electronic checks (direct bank debit), as an option alongside or exclusive of credit cards. eChecks carry a flat $0.25 per-use cost, with no additional transaction fee.

AutoPay
Enable your customers to set up an automatic recurring payment from their bank account or on a credit card. PayStand supports tokenization so your customer's authorization can be securely stored and used again.
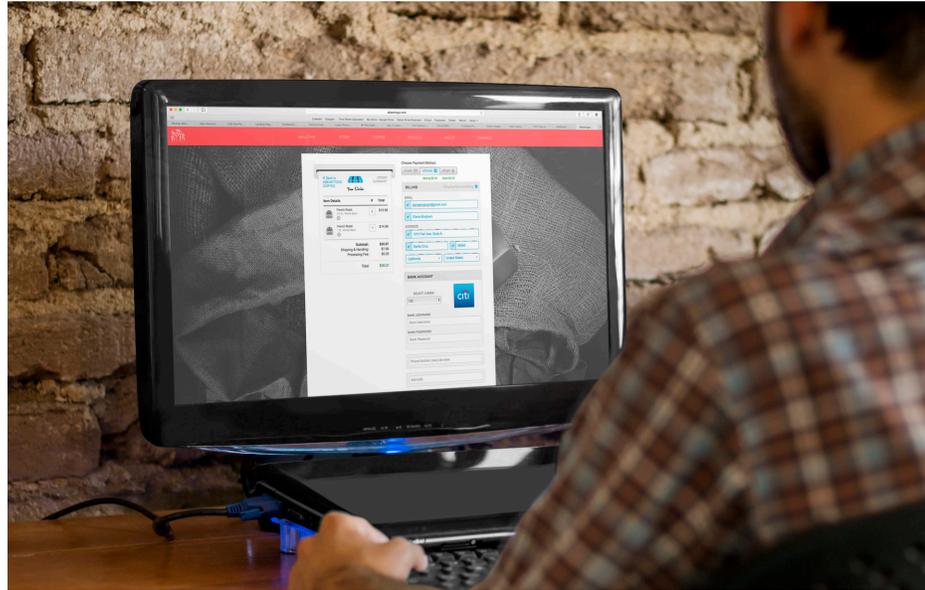

Mobile Payments
PayStand offers a mobile app for iPhone, which enables credit card, check and eCash payments on-the-go.

Photo Check Capture
Instantly process paper check payments with your smartphone's camera. The PayStand App performs instant funds verification and prompt settlement.

Card Processing
PayStand's credit card processing supports both online eCommerce and POS via our mobile app and card swiper. PayStand does not mark up our wholesale credit card rates.

API
PayStand has developed a rich and robust set of APIs that give developers total control and flexibility to integrate PayStand's feature set and interface.
