

## AUTOMATE YOUR NETSUITE-BASED REVENUE OPERATIONS

**ORACLE®**  
**NETSUITE**

## THE PAYSTAND SUITEAPP

Our Built-For-Netsuite SuiteApp extends the full functionality of PayStand directly into NetSuite, allowing NetSuite users to automate everything from invoicing to reconciliation without ever leaving the NetSuite dashboard.

With robust support for native NetSuite functionality and enhanced integration to support all payments, currencies, and entities, the PayStand SuiteApp offers best-in-class payments to NetSuite users.

### Enable Payments Like Never Before

- Zero-cost, 0% in-network payments
- Support legacy payment methods, including free eCheck, ACH, and credit / debit cards
- Predict payment costs with wholesale blended rates (and flat-fees for ACH and eCheck)
- Enable Least Cost Routing, including “Payer-Pays-Fees” features to reduce or remove the cost of transactions

### Embed Payments Directly in NetSuite Objects

- Empower Invoices, Sales Orders, and Statements with embedded payment links
- Enable customers to retrieve, select, and pay all open invoices
- Attach meta-data and custom fields to e-Invoices to improve reconciliation
- Create scheduled, recurring invoices within the NetSuite dashboard

### Reconcile Payments in NetSuite Immediately

- Instant booking of payments to your Invoices, Sales Orders, and Statements
- Real-time updates to records and ledgers throughout the transaction lifecycle - from your customer paying you to the cash in your bank
- Automatic transfer reports, updating your ledger with the details of every deposit, its transactions, and any Invoices and Sales Orders a deposit affects

## B2B PAYMENTS FOR THE DIGITAL ERA

## Control and Brand your Payment Experience

- Fully customizable Payer Portal offering multiple payment rails
- Brand the checkout, interface and invoice experience to your company
- Turn on/off multiple payment rails based on your business model
- White-label the payment experience to meet your company's needs

## Native Support for Advanced NetSuite Features

- Support for subsidiaries and multiples entities with OneWorld integration
- Ability to integrate with SuiteCommerce for advanced implementations
- Support multi-currency invoicing and presentment
- Virtual terminal for staff to conduct payments and engaged past payment methods

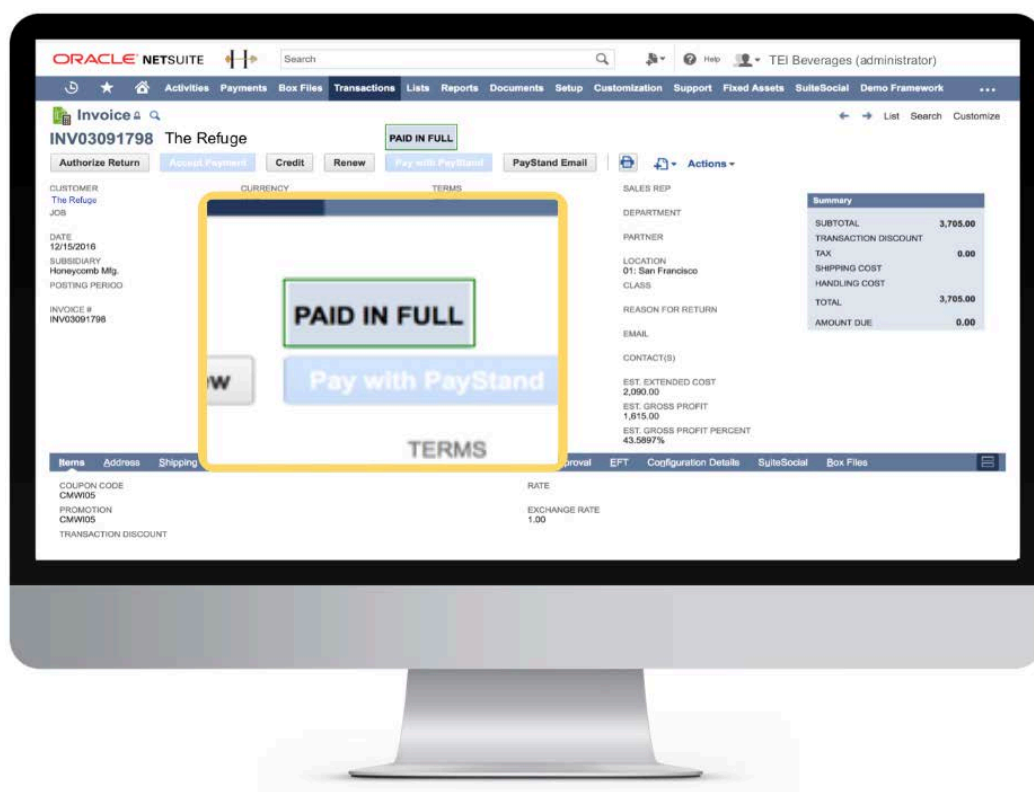

## Robust Security, Implementation, and Support Experience

- PayStand secures all customer payment information
- PCI DSS Level 1 and SOC II
- Provides a truly secure environment inside, and outside, your NetSuite

## Business Friendly Implementation and Support

- Dedicated relationship management and customer success teams with live support
- Direct phone and email support throughout implementation and daily operations
- Launch payments in NetSuite within weeks, not months
